

Compliance Program

What is it?

The Pink Slip Compliance program is a simple solution to promote increased compliance with slide sheet use. Is this program right for your facility? Consider these two questions:

- Is your facility still experiencing caregiver injuries when boosting or laterally transferring a patient?
- Do you feel your caregivers should be using the Pink Slip more frequently?

If you answered yes to either of these questions your facility would be a great candidate.

Our customers have reported reduced caregiver injuries after implementing Pink Slip dispensers into their current Pink Slip program.

How does it work?

The Pink Slip Compliance Program provides accessibility to the Pink Slip. It brings the slide sheet into the environment of care and out of the storage closet.

There are two types of dispensers to choose from:

- The Acrylic Dispenser which holds ten pink slips and is mounted in a central location to caregivers
- The Docking Station which holds one Pink Slip and is mounted in the patient room

When the Pink Slip is accessible, caregivers are more likely to use them to move patients.

What Is the Cost?

The Pink Slip Compliance Program is offered at no charge to our current Pink Slip customers. The Acrylic Dispensers and docking stations are offered to your facility at a deep discount.

What is Included?

- Consultation for dispenser placement
- Pink Slip refresher training
- Additional support materials – tip sheet/posters)
