

TC-300

Transport Stretcher / Treatment Chair

WY'EAST
MEDICAL

The TC-300 is a 2-in-1 device – treatment chair and stretcher – that looks and works exactly like the TotaLift. If you don't require the lateral transfer capacity of the TotaLift, the TC-300 is the perfect alternative. The TC-300 easily adapts to your departmental needs for patient examination, procedures, treatment and transport.
